Key Words:
- weather
- clouds
- season
- spring
- summer
- fall
- winter
Weather is what happens in the air.

What causes weather?
One cause is the sun. The sun’s heat warms the air.
Another cause is wind. Wind moves clouds through the air.
Clouds are made of water.
Warm air makes clouds bring rain.
Weather changes each **season**.
There are four seasons in a year.
Spring is a warm, rainy season. Many flowers bloom.
Summer is the hottest season. The days are sunny and long.
Fall is a cool, windy season. Leaves on some trees change color.
Winter is the coldest season. The icy air makes clouds bring snow.
Checking

Choose the best picture to answer each question.

1. What brings rain?

2. When do leaves change color?

3. What weather happens in winter?
Reflecting

Write about what you do in different types of weather. Complete these sentences:

When it rains, I ____________.
In winter, I ____________.
In summer, I ____________.
